BRAC is a global leader in developing and implementing cost-effective, evidence-based programs to assist the most marginalized people in extremely poor, conflict-prone, and post-disaster settings. These include initiatives in education, healthcare, microfinance, women’s and girls’ empowerment, agriculture, human and legal rights, and more. BRAC employs more than 110,000 people in 11 countries, with a total global expenditure of more than $1 billion. More than 75% percent of its budget in Bangladesh is self-financed through its own activity, including social enterprises and microfinance. However, much of BRAC’s most important work—including its schools, healthcare, ultra-poor graduation program, and most of its programs outside Bangladesh—remains reliant on outside donors.

We reach 120 million people in 11 countries

<tr>
<td>1.7M households completed the program in Bangladesh</td>
<td>We implement a large-scale poverty graduation program to reach the poorest people and help them achieve a sustainable livelihood in two years. To address extreme poverty globally, we advise and train governments, nonprofits, and UN entities to adapt and implement our approach. Studies show BRAC’s methodology significantly improves the income and well-being of participants for years after they complete the program.</td>
<td>Our education and skills development programs support youth from backgrounds of poverty from cradle through career. We prepare them for fulfilling futures through early childhood development, pre-primary, primary, and secondary schools, adolescent empowerment, skills development, and higher education at BRAC University.</td>
<td>To meet the needs of vulnerable communities, we developed our essential healthcare program, facilitated through a network of community health workers. We deliver community-based services, with a focus on maternal and child health, infectious diseases, nutrition, family planning, mental health, non-communicable diseases, and much more.</td>
<td>We provide inputs such as seeds and fertilizer, and training for farmers to improve their yields and profits. We link supply chains that enable farmers to access markets and sell their goods at a higher price, with the goal of improving food security and nutrition while also fostering economic growth.</td>
<td>With 7 million borrowers, we are one of the world’s largest microfinance providers. Access to financial services is an essential tool, especially for women in poverty. Microfinance works in tandem with other programs to increase clients’ economic independence. Our mobile money platform, bKash, is one of the largest in the world, reaching more than 28 million clients.</td>
